Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This office action is in response to the amendment submitted on 19 December 2006. Claims 1-14 are currently pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Schmidt et al (US Patent No. 6,840,993) for the reasons set forth in the previous office action which are herein incorporated by reference.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Applicant argues that the instant invention is not met by the reference as the reference does not teach the use of the same substrates as instantly claimed in the

Art Unit: 1755

examples. While the reference does not provide an example wherein the same substrate as instantly claimed is utilized it does suggest the one may be utilized. It should be noted that "A reference can be used for all it realistically teaches and is not limited to the disclosures in its specific examples". See *In re Van Marter et al* 144 USPQ 421; *In re Windmer et al* 147 USPQ 518, 523; and *In re Chapman et al* 148 USPQ 71. As for applicant's arguments concerning the standard deviation, since the instant claims recite a standard deviation of $\leq 20\%$ or $\leq 10\%$ this includes zero as a lower limit and therefore no deviation need be present. As for applicant's arguments that the reference does not recite that the pigment exhibits color travel this appears to be inherent and applicant has not provided any convincing evidence that the pigment of the reference does not exhibit color travel especially in view of the fact that the reference teaches similar materials.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 1755

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-23 of U.S. Patent No. 6,840,993 B2 for the reasons set forth in the previous office action which are herein incorporated by reference.

Applicant argues that the reference does not teach the same substrates, the standard deviation or that the pigment has color travel.

To these arguments the examiner respectfully disagrees. As for the types of substrates, the claims teach that the substrate may be the same as instantly claimed. As for applicant's arguments concerning the standard deviation, since the instant claims recite a standard deviation of $\leq 20\%$ or $\leq 10\%$ this includes zero as a lower limit and therefore no deviation need be present. As for applicant's arguments that the reference does not recite that the pigment exhibits color travel this appears to be inherent and applicant has not provided any convincing evidence that the pigment of the reference does not exhibit color travel especially in view of the fact that the reference teaches similar materials.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1755

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
